

EXPERIENCE INTERNATIONAL Agricultural Study Tours

California & Nevada Sample Itinerary

This 11-day study tour explores the agriculture sector in California, one of the breadbaskets and most productive farming areas in the world. The trip combines farm and industry visits with recreation and adventure! Whenever possible we include participatory activities such as rodeos and state fairs, and we promote cultural exchange with organizations like Young Farmers and Ranchers and Future Farmers of America. Through our specialized industry visits, we provide opportunities to explore both conventional and organic production. As always, our trips are tailored to the wishes and interests of each group.
